

Philip Warton – 10/1/19  
Homework 00  
Professor Emigh

1.

A positive experience I have had with science was taking Physics 211. I really enjoyed the challenge of problem-solving with the methods of thinking that we had learned. The approach was one that felt more universal and top-down than anything I had done previously.

2.

My least favorite concept in math is probably Laplace transforms, because we are taught to use a sheet of existing transformations and just plug it in. With a deeper understanding of how Laplace transforms operate I would appreciate them more (probably). I am majoring in mathematics so I am pretty excited to learn most math topics.
